

KEY SET DOESNOT EXIST

for the error mentioned by you, pls try following:

Pls check that your DSC is properly imported in e-token.
Remove the name of subscriber from Browser (Internet Explorer).

go to TOOLS >> INTERNET OPTION >> CONTENTS >> CERTIFICATES >> select the name of subscriber >> remove, than refresh your system.

BE assure that while following the above process of removal, you have not plug in your e-token in the system.

Further to that you can also do the following:

Go to start >> all programmes >> e-token >> etoken properties >> local Machine >> and uncheck the option for "copy certificate to computer store",

Try this prob. you will be able to sign the MCA form.
